# WHY RECYCLED PRODUCTS ?

## ECO-FRIENDLY & SUSTAINABLE PRODUCTS

Plastic waste is the one of major categories of municipal solid waste. We at Shakti ensure to incorporate waste as our resource, thus ensuring that less plastic is dumped at landfills.

## ENSURING A GREEN FUTURE TO OUR NEXT GENERATION

TSPI recycles plastic waste, in this way we are not only using plastic waste as our resource but also using less energy and less fossil fuels in comparison to products made of virgin plastic.

## TURNING WASTE TO VALUE

By recycling all sorts of plastic including multi-layer-plastic, usually considered non-recyclable, TSPI is maximizing its use of plastic waste as its input source into the manufacturing of recycled plastic pallets and granules.

## NEED OF THE HOUR (SHIFT FROM LINEAR TO CIRCULAR ECONOMY)

By encouraging and increasing the rate of recycling and recyclability of plastic products and plastic packaging including single use plastics (SUPs), we are closing the loop making sure the plastics is continually kept into the products life cycle, thus increasing concept of circular economy into our business.
