# WHY RECYCLED PRODUCTS?

## ECO-FRIENDLY & SUSTAINABLE PRODUCTS

Plastic waste is the one of the major challenges of Municipal Solid Waste. We at TSPI ensure that this waste is used as a resource, thus making sure that less plastic is dumped in landfills.

## ENSURING A GREEN FUTURE TO OUR NEXT GENERATION

By recycling plastic waste TSPI, ensures that it is not only used as a resource but also helps in consuming less energy which results in using plastic waste as resource but also using less energy fuels to products made of virgin plastic.

## TURNING WASTE TO VALUE

By recycling all sorts of plastic waste including Multi-Layer Plastic (MLPs), TSPI is maximising the recyclability of plastic waste and manufacturing raw materials out of it which are further used to make new products.

## NEED OF THE HOUR (SHIFT FROM LINEAR TO CIRCULAR ECONOMY)

By encouraging and increasing the rate of recycling of plastic waste, we are closing the loop and making sure the plastic is continuously kept into the product life cycle, thus inculcating the concept of circular economy into our business.
