Services – Industrial WM

At TSPI, we offer a range of services for industrial waste management:

1. Collection to Disposal:

We provide regular collection & Disposal services for industrial waste materials, ensuring that it is collected and transported safely and efficiently.

2. Recycling:

We use advanced technology to recycle industrial waste materials into new, sustainable products.

3. Management:

We manage and monitor the entire waste management process to ensure it runs smoothly and efficiently.

4. Training:

We offer training on waste management and environmental sustainability to help companies improve their operations.

5. Authorization:

We hold all necessary
government
authorization to operate
in industrial waste
management.

Types of waste we manage

Plastic

Hazardous

Paper

Glass

Metal

E-waste

Clients and Partnerships

We are leading provider of industrial waste management solutions for big brands across various industries.

Plastic Waste we manage

- 1. Polyethylene (PE):** This is a widely used plastic with a low density and high flexibility. It's used in packaging materials, such as plastic bags and plastic wraps.
- 2. Polypropylene (PP):** This plastic is known for its high strength and durability. It's used in a variety of products, such as automotive parts, packaging materials, and textiles.
- 3. Polyvinyl chloride (PVC):** PVC is a strong, durable plastic that's resistant to chemicals and weather. It's commonly used in construction materials, such as pipes and window frames.
- 4. Polystyrene (PS):** This plastic is lightweight and has good insulation properties. It's used in products such as disposable cups and food packaging materials.
- 5. Polyethylene terephthalate (PET):** This is a strong, lightweight plastic that's commonly used in packaging materials, such as bottles and jars.
- 6. Acrylonitrile butadiene styrene (ABS):** This is a tough, heat-resistant plastic that's often used in electronic devices and automotive parts.
- 7. Polycarbonate (PC):** This is a strong, durable plastic that is known for its transparency and resistance to impact. It's commonly used in applications such as safety glasses, electronic housings, and automotive parts.

Hazardous Waste

TSPI provides comprehensive industrial waste management services, including collection, transportation, processing, recycling, disposal, management and monitoring. We aim to improve companies' environmental efficiencies through resource recovery practices such as recycling and converting materials into sustainable products.

Hazardous Waste

- Chemical Waste
- Hazardous Waste
- Paint Sludge
- Spent Carbon
- Activated Carbon
- Carbon Black
- Fertilizer Composts
- ETP Sludge
- Tyre Waste
- Fly Ash Content
- Gypsum

Printing Industry

- Waste Inks
- Ink Sludges
- Solvents

Chemical Manufacturers

- Acids and Bases
- Spent Solvents
- Reactive Wastes
- Waste Containing
- Organic Constituents

Construction Industry

- Ignitable Paint Waste
- Spent Solvents
- Strong Acids and Bases

Petroleum and Refining Industry

- Waste Water Containing
- Benzene & Other
- Hydrocarbons
- Sludge from Refining Process

Paper Industry

- Paint Waste Containing
- Ignitable Solvents
- Leather and Products Industry
- Toluene and Benzene

Sample Certificate

The Shakti Plastic Industries issues recycling certificates for all companies from whom we receive plastic scrap material. This document serves as proof of recycling for government departments.

Sample Format

Ref: _____

Date: _____

RECYCLING/PROCESSING

CERTIFICATE

This is to certify that XYZ Ltd -Address _____ has supplied has _____ Kgs of Plastic – Wastage Scrap, for recycling at our plant located at Gut No. 158 &159, Village Nandgaon, Manor, Tal. & Dist.: Palghar.

The following details of invoices and quantity certify the same.

Date	Invoice No.	Quantity
	Total Kgs.	

This is further certified that the total quantity of Plastic Scrap received has been recycled as per the MPCB norms laid under Plastic Waste Management Rules, 2016.

MPCB No. _____

CPCB No. _____
